MEDCHEM

Axon Medchem

- A top-line chemistry service platform specialized in contract research in medicinal chemistry and high-quality synthesis of bio-active and/or drug-like molecules.

- Proven track record in developing novel drug candidates and achieving excellence for a decade by collaborating with partners and serving research scientists all over the world.

- Prime source of highest performance and up-to-date life science reagents, providing Axon Ligands™ for advanced pharmaceutical research.

Axon Ligands™

A unique collection of biologically active molecules, as world-wide recognized research tools and drug standards in different application fields such as neurological disorders, cardiovascular disease, pain and inflammation, and cancer.

Featured ligands with our expertise including CNS reagents, ion channel modulators, signal transduction regulators (such as kinase inhibitors) and much more....

“Help us help you!”

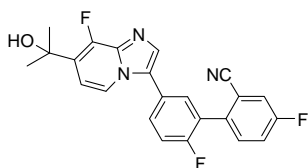

It is as simple as an email, a fax or a phone call. Any serious suggestion is welcome to enrich our expertise. Welcome to explore and utilize our services. Welcome to test and prove Axon Ligands™ with your expected bio-activities.

Examples of Axon Ligands™ produced for research use

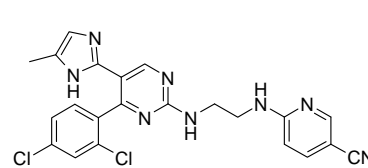

TP 003
GABAA α 3 agonist

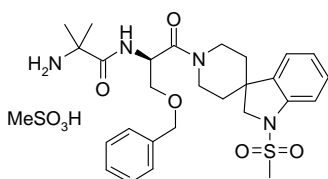

(+)-PHNO
D2 agonist

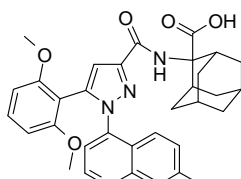

PD 0325901
MEK inhibitor

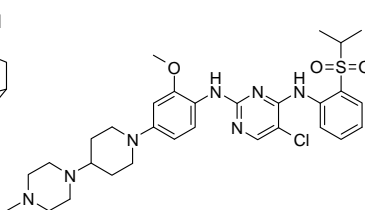

CT 99021
GSK3 inhibitor

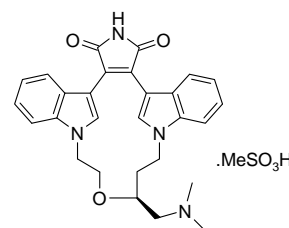

MK 677
growth hormone
secretagogue

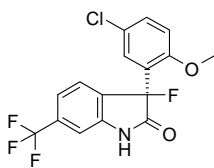

SR 48692
NT antagonist

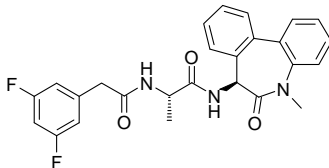

NVP-TAE 684
ALK inhibitor

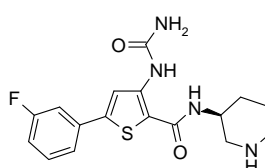

LY 333531
PKC β inhibitor

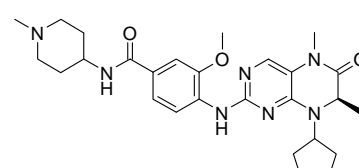

(S)-(+)-BMS 204352
K⁺ channel opener

γ -Secretase inhibitor
DBZ

AZD 7762
CHK inhibitor

BI 2536
PLK1 inhibitor
