Near appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq			
Near appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13.			
Wear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq materials according to section 13. 7 - Handling and Storage			
Wear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq materials according to section 13. 7 - Handling and Storage Handling procedures and equipment	uid-binding material. After removal, ventilate	e and decontaminate surfaces and equipme	nt with alcohol. Dispose of contaminated
 Wear appropriate protective clothing. Vacuabsorb solutions with finely-powdered liquaterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin au 	uid-binding material. After removal, ventilate		nt with alcohol. Dispose of contaminated
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq materials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin an independent air supply.	uid-binding material. After removal, ventilate	e and decontaminate surfaces and equipme	nt with alcohol. Dispose of contaminated
Wear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1	uid-binding material. After removal, ventilate	e and decontaminate surfaces and equipme	nt with alcohol. Dispose of contaminated
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq materials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under i 3 - Exposure Control / Personal Proc	uid-binding material. After removal, ventilate nd clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection	e and decontaminate surfaces and equipme	int with alcohol. Dispose of contaminated
 Wear appropriate protective clothing. Vacuabsorb solutions with finely-powdered liquaterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and adpendent air supply. Storage requirements Store in a properly sealed container under 13 3 - Exposure Control / Personal Procession 	uid-binding material. After removal, ventilate nd clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos	nt with alcohol. Dispose of contaminatec ure. Use in a chemical fume hood, with ar Protection of respiratory system
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin an independent air supply. Storage requirements Store in a properly sealed container under in 8 - Exposure Control / Personal Pro Exposure limits No data available	uid-binding material. After removal, ventilate nd clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat	e and decontaminate surfaces and equipme	int with alcohol. Dispose of contaminated
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin an independent air supply. Storage requirements Store in a properly sealed container under in 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical propertie	uid-binding material. After removal, ventilate and clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under in 3 - Exposure Control / Personal Pro- Exposure limits No data available 0 - Physical and chemical properties Batch molecular formula	uid-binding material. After removal, ventilate and clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity	Int with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq materials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 3 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS	uid-binding material. After removal, ventilate nd clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5%	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 13 9 - Exposure Control / Personal Pro Exposure limits No data available 9 - Physical and chemical propertie Batch molecular formula 223H27CI2N3OS Batch MW	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee)	Int with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Wear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin an independent air supply. Storage requirements Store in a properly sealed container under 18 8 - Exposure Control / Personal Pro Exposure limits No data available 9 - Physical and chemical propertie Batch molecular formula C23H27Cl2N3OS Batch MW 164.45	uid-binding material. After removal, ventilate nd clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5%	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 13 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula 223H27CI2N3OS Batch MW 64.45 10 - Stability and reactivity	uid-binding material. After removal, ventilate and clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Metting point 139.7 - 141.5 °C	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A.	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stability	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with au Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stability	uid-binding material. After removal, ventilate and clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with au Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stability	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Metting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2),	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with au Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stability	uid-binding material. After removal, ventilate and clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Metting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong	Int with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with an Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. Y - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under in B - Exposure Control / Personal Pro- Exposure limits No data available 0 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stable under normal handling conditions.	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Metting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2),	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. Y - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under i B - Exposure Control / Personal Pro- Exposure limits No data available 0 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stable under normal handling conditions. 11 - Toxicological information	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition.	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents.	Int with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL) 0.0
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq materials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 3 - Exposure Control / Personal Pro- Exposure limits No data available 3 - Physical and chemical properties Batch molecular formula C23H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stabile under normal handling conditions. 11 - Toxicological information Toxicity	uid-binding material. After removal, ventilate the storage conditions indicated on the label. itection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents. Mutagenicity	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL) 0.0 Teratogenicity
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin an ndependent air supply. Storage requirements Store in a properly sealed container under 13 8 - Exposure Control / Personal Pro- Exposure limits No data available 9 - Physical and chemical properties Batch molecular formula 223H27CI2N3OS Batch MW 164.45 10 - Stability and reactivity Stability Stable under normal handling conditions. 11 - Toxicological information Foxicity No data available	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition.	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents.	Int with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL) 0.0
Vear appropriate protective clothing. Vacu Absorb solutions with finely-powdered liq naterials according to section 13. 7 - Handling and Storage Handling procedures and equipment Avoid inhalation, contact with eyes, skin and ndependent air supply. Storage requirements Store in a properly sealed container under 1 3 - Exposure Control / Personal Pro- Exposure limits No data available 0 - Physical and chemical properties Batch molecular formula 223H27CI2N3OS Batch MW 644.45 10 - Stability and reactivity Stability Stable under normal handling conditions. 11 - Toxicological information Foxicity No data available 12 - Ecological information	uid-binding material. After removal, ventilate the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Metting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity No data available	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents. Mutagenicity No data available	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with ar Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL) 0.0 Teratogenicity
Vear appropriate protective clothing. Vacu basorb solutions with finely-powdered liq naterials according to section 13. ' - Handling and Storage dandling procedures and equipment woid inhalation, contact with eyes, skin and dependent air supply. Storage requirements store in a properly sealed container under i - Exposure Control / Personal Pro- Exposure limits to data available 0 - Physical and chemical propertie Batch molecular formula 23H27CI2N3OS Batch MW 164.45 0 0 - Stability and reactivity Stable under normal handling conditions. 1 - Toxicological information Toxicity to data available 2 - Ecological information Treat as potentially toxic. Runoff from fire c	uid-binding material. After removal, ventilate the storage conditions indicated on the label. itection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity	e and decontaminate surfaces and equipme hing. Avoid repeated and/or prolonged expos Protection of eyes Appropriate safety glasses Chemical purity 99.5% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents. Mutagenicity No data available	nt with alcohol. Dispose of contaminated ure. Use in a chemical fume hood, with an Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL) 0.0 Teratogenicity
Vear appropriate protective clothing. Vacu basorb solutions with finely-powdered liq- naterials according to section 13. ' - Handling and Storage dandling procedures and equipment woid inhalation, contact with eyes, skin and dependent air supply. Storage requirements store in a properly sealed container under i - Exposure Control / Personal Pro- Exposure limits lo data available - Physical and chemical properties atch molecular formula 23H27CI2N3OS Batch MW 64.45 0 - Stability and reactivity Stability Stable under normal handling conditions. 1 - Toxicological information Toxicity lo data available 2 - Ecological information reat as potentially toxic. Runoff from fire c 3 - Disposal considerations	uid-binding material. After removal, ventilate and clothing. Wear appropriate protective clot the storage conditions indicated on the label. tection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 139.7 - 141.5 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity No data available ontrol or dilution with water may cause polluti	e and decontaminate surfaces and equipme hing.
