Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage fandling procedures and equipment word inhalation, contact with eyes, skin a hetependent air supply. Storage requirements tore in a properly sealed container under in - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical properties atch molecular formula C15H21FN2O2.HCI Batch MW 16.80	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Stection <i>Protection of hands/skin</i> Chemical resistant gloves and lab coat S <i>Appearance</i> White solid	d decontaminate surfaces and equipment with ning. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8%	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
Absorb solutions with finely-powdered liquic coording to section 13. 7 - Handling and Storage dandling procedures and equipment wooid inhalation, contact with eyes, skin a holependent air supply. Storage requirements store in a properly sealed container under in a - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical propertie statch molecular formula C15H21FN2O2.HCI Batch MW 16.80	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. otection Protection of hands/skin Chemical resistant gloves and lab coat s Appearance White solid Melting point	d decontaminate surfaces and equipment with ning. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A.	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage Handling procedures and equipment word inhalation, contact with eyes, skin a dependent air supply. Storage requirements Store in a properly sealed container under in - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical properties Batch molecular formula 15H21FN2O2.HCI Batch MW 16.80 0 - Stability and reactivity Stability	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. otection Protection of hands/skin Chemical resistant gloves and lab coat s Appearance White solid Melting point	d decontaminate surfaces and equipment with ning. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee)	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage landling procedures and equipment void inhalation, contact with eyes, skin a idependent air supply. Storage requirements itore in a properly sealed container under i - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical propertie Batch molecular formula 15H21FN2O2.HCI Batch MW 16.80 0 - Stability and reactivity Stability	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Diffection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C	d decontaminate surfaces and equipment with ning. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A.	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL)
Absorb solutions with finely-powdered liquid ccording to section 13. F - Handling and Storage Handling procedures and equipment Wold inhalation, contact with eyes, skin a ndependent air supply. Storage requirements	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. otection Protection of hands/skin Chemical resistant gloves and lab coat s Appearance White solid Melting point 183.5 - 184.6 °C Reactivity	d decontaminate surfaces and equipment with ning. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage Handling procedures and equipment word inhalation, contact with eyes, skin a dependent air supply. Storage requirements Store in a properly sealed container under in - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical properties Batch molecular formula 15H21FN2O2.HCI Batch MW 16.80 0 - Stability and reactivity Stability	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Ditection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage landling procedures and equipment void inhalation, contact with eyes, skin a idependent air supply. Storage requirements itore in a properly sealed container under i - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical propertie Batch molecular formula 15H21FN2O2.HCI Batch MW 16.80 0 - Stability and reactivity Stability	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Detection Protection of hands/skin Chemical resistant gloves and lab coat s Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic coording to section 13. - Handling and Storage fandling procedures and equipment word inhalation, contact with eyes, skin a hodependent air supply. Storage requirements tore in a properly sealed container under to a - Exposure Control / Personal Pro- storosure limits to data available - Physical and chemical properties atch molecular formula 15H21FN2O2.HCI Batch MW 16.80 0 - Stability and reactivity Stability table under normal handling conditions.	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Stection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2),	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL)
boorb solutions with finely-powdered liquic coording to section 13. - Handling and Storage fandling procedures and equipment word inhalation, contact with eyes, skin a independent air supply. Storage requirements itore in a properly sealed container under 1 - Exposure Control / Personal Pro- Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical properties atch molecular formula 15H21FN202.HCl Batch MW 16.80 0 - Stability and reactivity Stability table under normal handling conditions. 1 - Toxicological information	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Direction Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition.	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents.	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL) 42.0
bsorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage landling procedures and equipment word inhalation, contact with eyes, skin a idependent air supply. Storage requirements itore in a properly sealed container under 1 - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical propertie Batch molecular formula 15H21FN202.HCI Batch MW 16.80 0 - Stability and reactivity Stability itable under normal handling conditions. 1 - Toxicological information Toxicity	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Direction Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo- Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents. Mutagenicity	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL) 42.0 Teratogenicity
bsorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage landling procedures and equipment void inhalation, contact with eyes, skin a idependent air supply. Storage requirements tore in a properly sealed container under 1 - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical propertie Batch molecular formula 15H21FN2O2.HCI tatch MW 16.80 0 - Stability and reactivity table under normal handling conditions. 1 - Toxicological information foxicity to data available	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Direction Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition.	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents.	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL) 42.0
bsorb solutions with finely-powdered liquic ccording to section 13. - Handling and Storage landling procedures and equipment void inhalation, contact with eyes, skin a idependent air supply. Storage requirements tore in a properly sealed container under 1 - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical properties Patch molecular formula 15H21FN202.HCl Patch MW 16.80 0 - Stability and reactivity table under normal handling conditions. 1 - Toxicological information oxicity to data available 2 - Ecological information	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective clot the storage conditions indicated on the label. Stection Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity No data available	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo- Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents. Mutagenicity No data available	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL) 42.0 Teratogenicity
bsorb solutions with finely-powdered liquic coording to section 13. - Handling and Storage landling procedures and equipment void inhalation, contact with eyes, skin a idependent air supply. torage requirements tore in a properly sealed container under to - Exposure Control / Personal Pro- xposure limits to data available - Physical and chemical properties tatch molecular formula 15H21FN2O2.HCI tatch MW 16.80 O - Stability and reactivity table under normal handling conditions. 1 - Toxicological information foxicity to data available 2 - Ecological information reat as potentially toxic. Avoid strong oxidizing agents. Mutagenicity No data available m. Applicable HS class 2942.00.0000	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalation Solubility in water (mg/mL) 42.0 Teratogenicity No data available Transportation (Land/Sea/Air)
boorb solutions with finely-powdered liquic coording to section 13. - Handling and Storage fandling procedures and equipment word inhalation, contact with eyes, skin a hedependent air supply. Storage requirements tore in a properly sealed container under 1 - Exposure Control / Personal Pro- Exposure limits to data available - Physical and chemical properties atch molecular formula 15H21FN2O2.HCI Batch MW 16.80 0 - Stability and reactivity Stability table under normal handling conditions. 1 - Toxicological information foxicity to data available 2 - Ecological information reat as potentially toxic. Runoff from fire c 3 - Disposal considerations reat as potentially toxic. Dispose in accord 4 - Transport Information US) DOT shipping name to data available 5 - Regulatory Information	d-binding material. After removal, ventilate and nd clothing. Wear appropriate protective cloth the storage conditions indicated on the label. Direction Protection of hands/skin Chemical resistant gloves and lab coat S Appearance White solid Melting point 183.5 - 184.6 °C Reactivity May emit toxic gasses like carbon monoxide (CO), carbon dioxide (CO2), hydrochloric acid (HCI), nitrogen oxide upon thermal decomposition. Carcinogenicity No data available ontrol or dilution with water may cause pollution tance with local, state, and federal regulations	d decontaminate surfaces and equipment with hing. Avoid repeated and/or prolonged expo- Protection of eyes Appropriate safety glasses Chemical purity 99.8% Optical purity (ee) N.A. Conditions and materials to avoid Protect from light and heat. Avoid strong oxidizing agents. Mutagenicity No data available m. Applicable HS class 2942.00.0000 CAS number	h alcohol. Dispose of contaminated materia sure. Use in a chemical fume hood, with Protection of respiratory system Handle in fume hood. Prevent inhalatio Solubility in water (mg/mL) 42.0 Teratogenicity No data available Transportation (Land/Sea/Air)
